

> INTRODUCING THE NEW 7060 LED TACTICAL LIGHT

In a rare collaboration between public and private sectors, the City of Los Angeles Police Department™ and Pelican™ Products have developed the 7060 LED as the standard issue tactical/patrol flashlight for all ten thousand LAPD officers.

The Pelican 7060 LED light employs new dual switch technology that allows the light to be activated by either a side switch or a tail switch. The dual switches, which include a momentary mode, allows the user to grip the light in several positions and still control activation. The light incorporates rechargeable Lithium-Ion batteries for maximum brightness and light weight.

Switch from patrol to tactical mode in seconds

Official light of the Los Angeles Police Department.

DUAL SWITCH TECHNOLOGY

The world's first flashlight with three way on/off and momentary activation

FACETTED SERRATED LENS SHROUD

The beam shines through notches which shows the user if the light is activated while standing lens down on a surface

LOW BATTERY ALERT

Light blinks to indicate low battery

ADVANCED LED TECHNOLOGY

A current regulator maintains peak brightness at 130 lumens for 90 minutes of burn time.

RECHARGEABLE

3.7v, 2200mAh Lithium-Ion battery charges in 4-5 hours

GRENADE GRIP

No-slip pattern for handling in wet conditions

MOMENTARY PULSE

Rapidly pulsing the beam disorients suspects

COOLING FINS

Machined aluminum heat sink draws heat away from LED

OPTIMIZED BEAM

A focused primary beam penetrates darkness up to 120 yards, a secondary 12 foot pool illuminates the immediate periphery

> FREE ACCESSORIES INCLUDED

DESK/DASH CHARGER BASE UNIT

Red blinking LED indicates flashlight is charging when snapped into charger base unit. Flashlight is fully charged when LED turns green.

CORDURA® HOLSTER

Made out of tough Nylon the Cordura holster will keep your 7060 LED secure at all times.
